DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Allen (2004/0117427) teaches a method for encoding video for streaming over a network (Abstract, Paragraph [0505]). The method performs a pre-processing step (1803) which is further explained in Figure 17 (Paragraph [0497]). The pre-processor performs the operation of converting the video source to a common color format and temporally down sampling the video (Paragraph [0498]). Note, Allen teaches each operation is optional and thus independent on each other, therefore performing temporal down sampling and color format conversion may be performed in any order as the outcome is the same (Paragraph [0499]). The pre-processing is taught by Allen in order to provide a continuous pipeline for producing optimum image quality for input by multiple encoders(1805) (Paragraphs [0502] and [0503]). Allen further teaches the use of the MPEG encoding standard (Paragraph [0486]). Allen is silent on the operation of the encoders. Allen further lacks the HVS as claimed. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
